BRAIN SCIENCE

## PUTTING YOUR CHILD'S FUTURE IN GREAT MOTION.

*Our bespoke solution offers top-tier ERP integration, smart learning technologies, mental wellness support, and a pioneering Information Technology curriculum. Experience the pinnacle of educational advancement and innovation with our unparalleled offerings."*

## Why do we exist?

Dreaming, Teaching, and Learning

At IBRI, our vision is to lead a transformative shift in education, blending cognitive science with innovative pedagogical techniques to create a dynamic, future-ready learning environment. We aim to nurture lifelong learners by integrating brain science into every facet of education, fostering intellectual curiosity, creativity, and emotional resilience. By leveraging the latest advancements in neuroscience, we envision developing a generation of leaders and thinkers, equipped with the skills necessary to navigate and excel in a rapidly evolving world.

We are committed to creating a holistic learning experience that prepares students not just academically but socially and emotionally, cultivating confident, self-directed individuals who can thrive in diverse global environments.

## About Us

At IBRI Education Pvt. Ltd., we have been transforming education since 2008 as a leader in Cognitive Science Research & Development. Our brain development programs foster holistic growth, equipping children with essential skills for life. For the last many years, we have trained 210000 + students in different proficiencies of the Brain, Dhyan, Neurobics, Flexible Learning, Teacher Training, Parent Training, Business Trainings, and Life Skill Trainings.

We offer Learn+ for personalized learning, School+ for school system upgrades, and Career+, which guides students in exploring suitable career options. Our initiatives align with the NEP 2020 framework, integrating brain science principles to enhance educational practices. We also train parents and teachers, providing brain testing services to help learners identify strengths and unlock their potential.

### Chairman's Message from IBRI Research Centre

I wish you a very warm welcome to IBRI!! We have succeeded in providing local families with an excellent education and our achievements can be seen through rapid improvements in education and world records by our trainees. True learning by way of, the technology of learning by latest techniques to keep a vast memory is as simple as one can imagine, All of us can do it very easily with a little effort and IBRI techniques Good Luck!!!

### MISSION

At IBRI, we are committed to empowering children to learn, explore, and excel by embracing innovative teaching methods and a brain-science-based approach to education. Our mission is to nurture motivated, confident students who demonstrate empathy, work diligently towards their goals, and grow in an inclusive academic environment. By leveraging cognitive science, we aim to transform learning, enabling students to achieve extraordinary skills and success every day in a supportive and dynamic environment.

# Management Committee

**Brig (Dr) BK Khanna, SM, VSM\*\***

Chairman Advisory Committee

Presently Brig Khanna is Member of UNDRR ARISE Global Board , Geneva for 3 years from 13 Sep 2023 (Only Member to be elected from India so far) and CEO ARISE INDIA. Former Founder Senior Consultant, National Disaster Management Authority, Govt of India for 9 years. Former Senior Consultant, National Institute of Disaster Management, Ministry of Home Affairs for 2 years. DM Advisor to FICCI from 2004 to Sep 2023 and DM and Climate Change Advisor to over 18 professional organisations. Chairman Crisis & DM Services , New Delhi, Chairperson, Facility & DM Skilling Council & Chairperson, India Skills Development Council. Has taken part in all Counter Insurgencies in India from 1966. to 1997. Took part in 1971 Indo Pak war, 1987 OP PAWAN (Srilanka) and 1999 Kargil war. Decorated 8 times by President of India. For bravery and exceptional services. Pioneer in starting Mock Exercises in India while in NDMA. Has conducted over 2130 capacity development programs and mock exercises in all types of 897 big and MSMEs, in 37 Universities/ professional institutions, 387 schools/colleges, Malls, offices, cine complexes, residential areas, ports, airports and multi districts, states and at UN level between countries. Did Ph.D in Terrorism, D.Litt in DM & MBA in International Relations. Familiar face as a panellist on 18 Indian Channels, on Security, disaster management and climate change.

Internationally acclaimed Dr Sandeep Marwah is an incredible name in the world of films. With nine world records in his kitty, he stands distinct as the founder of Noida Film City, and the creator of Marwah Studios. He is the designer behind the Academy of Film & Television, which is one of the ten best film schools, in the world. As the producer of the largest number of short films in the world, he has been associated with innumerable feature films, television programs, and amateur training films. As Global Cultural Minister, he heads over 100 national, and international media and social organizations besides being president of the International Chamber of Media & Entertainment industry. At present, he is the Chancellor of AAFT University of Media and Arts and has been appointed the Chief Scout for India,

**Dr Sandeep Marwah**

Corporate Advisor

**Sababbi Mangal**

Founder & CEO

Memory Guru | Life Coach | Business Coach | Mental Health Specialist

Holder of 3 World Records, Author of 12 Books, Inventor, Unlimited Years Calendar

He is a professional Memory Trainer, who holds 3 World Records in Memory, Mind, and Brain Power. He is the first Indian to break World Record in Super Strong Memory & Mental Calculations in the presence of a massive audience of around 20,000 people at VNIT Nagpur during the event Aarohi – 09. He has authored 12 books on memory and mind holds World Wide Copyright for his invention World's Longest Unlimited Years of Calendar. Using his memory techniques many students have created World Records for Fastest Memorizing and extraordinary brain powers. He has been published in various News Papers like The Tribune, Dainik Bhaskar, Ajit, Punjab Kesari, and Dainik Jagran conducting double your memory seminars in multiple countries of the World.

**Prof (Dr) H.S. Sharma**

Member, Board of Directors

He has done BE, NESC, PGSBMIA, MSc, ALCCS, PhD, Dlit\*, Dsc\*\*. He is the President Association for Unity of Mind (AUM), President Institute of Advanced Research and Training (IART), Past President and DF IETE, Past Chairman CSI Ghaziabad, Past Chairman IEI Ghaziabad and Council Member IEI and Council Member Rashtriya Sainik Sanstha, Editor-in-Chief Mind Universe Science & Technology (MUST). He has over 50 years of experience in Academic Institutions, Public and private sector companies, Defence, Professional Institutions, Publications etc. He has written more than 60 books ( 50 Published) and 200 articles on topics like Science and Spirituality, Yoga, Internet, Computers and cognition, Human Mind etc.

**Dr. Tulika Mehta**

Director, Promotions

Dr. Tulika Mehta is a Senior Strategic Leader with 10+ years of experience in Skill development Project management, Monitoring and evaluation, Event management, People management, Strategy Operations and Livelihood. She holds an active role in chambers associated with industries like PHDCCI, is a mentor with the Institute of Engineers, is a member of CII, and is a board member of GCCI. She is an integral part of the Science and Management Committee, Shimla. She is also the founder of an IT company Kaizen Systems. She has served as a resource for many premier universities and Fortune 500 Companies. She is active and responsible for getting business on board or evaluating the business development team. She has acquired management skills, including organisation, delegation, and a positive attitude. she is capable of handling the stressful environment that can arise in the field. She holds attention to detail and creativity which allow the vision of the future to have a positive outlook.

**Dr Nina Khanna**

Member, Advisory Board

She has Completed PhD from Suresh Gyan Vihar University and post-graduated from Jaipur National University with an integrated course (B.Tech Biotechnology+ MBA). A seasoned professional with extensive experience in DMIT (Dermatoglyphics Multiple Intelligence Test) counselling, teaching, and research, she has dedicated over a decade to understanding human potential and development. Her counselling expertise lies in guiding individuals to discover their innate abilities through fingerprint analysis, helping them achieve personal and professional growth. She has taught in numerous workshops and trained others in the application of DMIT, while her research contributions focus on advancing the field's scientific foundations. Passionate about empowering individuals, she blends practical experience with academic rigour to deliver transformative results in education and personal development.

**Mrs. Rinku Rani**

Managing Director

Mrs. Rinku Rani is a renowned mentor who is an expert in the field of Teacher Training and Research & Development. She is an International Child Psychologist with practice of more than 11 years and Education Consultant having trained a lot of ordinary children, who achieved World Records in the field of Memory and Concentration

**Dr Aditi Sharma**

Head HR Department, IBRI

# Management Committee

Dr Daniel Park multiple times a world record holder from South Korea is widely known as the god of yoga through various Korean broadcasting companies. He has been promoting Yoga with the goal of nurturing leaders to promote breathing techniques, meditation, and Dan Asana with Orthodox Yoga. Yogi Daniel invented 72 Yoga techniques for breathing, meditation, Yoga Physical therapy, and 3,500 asanas of Yoga for yoga leaders and the general public. He is a member of the American Chamber of commerce Since 31st January 1996. In 2017 he achieved 2 World Records for the Most Super Pushups. He was appointed as an Ambassador of the Pyung Chang Winter Olympics 2018. He has been appointed as an honorary ambassador of the Korea Medical Tourism Promotion Association on 10th June 2018. In 2019, he was appointed as an Advisory Member of the Korean Society of Aromatherapy.

**Dr Daniel Park**  
Chairman, IBRI Research Centre

**Rahul Bhatia**  
Member, Board of Directors

Rahul Bhatia is a seasoned professional with 22 years of experience in developing business within the K-12 & higher education sector. His career is marked by a strong commitment to driving business growth and fostering successful collaborations. His strategic prowess extends to developing and executing comprehensive offline and online promotional strategies, leveraging last mile connect partnerships to effectively reach students across diverse markets. With previous roles including Partner at Cosmos Edu Services and Associate Partner at Learning Links Foundation, Rahul has consistently excelled in promoting student test prep solutions and driving registrations for standardized tests like TOEFL-IBT & GRE. Throughout his career, he has demonstrated exceptional leadership in establishing educational agent networks, forging strategic partnerships, and managing high-performance teams. Rahul's expertise in strategy development, sales management, and relationship building underscores his ability to exceed targets and drive impactful outcomes in the education industry.

Ranit Chatterjee is an architect turned disaster management professional with a doctoral degree in environmental management from Kyoto University, Japan. Having a work experience of over 12 years, he has been involved in various projects spanning from architectural planning & conservation to disaster risk reduction in countries across Asia such as India, Japan, Nepal, Laos, and so on. He has worked with UN organizations, national and local governments, the private sector, and academia in the past. Ranit is a visiting associate professor at Keio University in Japan. He is co-founder of RIKA India, a research-based startup to undertake research to bring evidence on disaster risk reduction and climate change adaptation. In addition, he is one of the founding members of UINSPIRE Alliance, a network of young professionals to further science, engineering, technology, and innovation in the Asia Pacific region. Ranit is an IRDR Young scientist fellow (Integrated Research on Disaster Risk), a CEM member of the IUCN business and biodiversity group, and an Advisory member of UNDRR's Stakeholder Engagement Mechanism (SEM).

**Prof Dr. Ranit Chatterjee**  
Member, Board of Directors

**Vishal Bhatia**  
HOD, iQMetric Labs

A man with not only a vision, but with high emotions and patients for others Vishal Bhatia, who in childhood was not so good student in education, but in extra curriculum activities especially like sports, always dreams big about helping and sharing his knowledge with all. He has a vast experience in training, sales & marketing. He already trained & motivated more than 17000 parents and children across the country. He is an expert in the field of Psychology and changing lives having more than 8 years of rich experience.

## © Cognitive Science

Cognitive science is the interdisciplinary, scientific study of the mind and its processes. It examines the nature, tasks, and functions of cognition (in a broad sense). Cognitive scientists study intelligence and behaviour, with a focus on how nervous systems represent, process, and transform information. Mental faculties of concern to cognitive scientists include language, perception, memory, attention, reasoning, and emotion; to understand these faculties, cognitive scientists use research from fields such as linguistics, psychology, artificial intelligence, philosophy, neuroscience, and anthropology. The typical analysis of cognitive science spans many levels of the organization, from learning and decision to logic and planning; from neural circuitry to modular brain organization. One of the fundamental concepts of cognitive science is that "thinking can best be understood in terms of representational structures in the mind and computational procedures that operate on those structures." The goal of cognitive science is to understand the principles of intelligence with the hope that this will lead to a better comprehension of the mind and of learning and to develop of intelligent devices.

## ITS FOR ALL!

ADVANCE BRAIN & SKILL  
DEVELOPMENT PROGRAMS FOR

Our centre is dedicated to enhancing the life skills of every individual we serve.

We Shape minds, transform futures, and unlock your potential with a rewarding career. Join a passionate community of educators at IBRI.

## RESEARCH & DEVELOPMENT

# International Brain Research Institute

We took the initiative to build a platform to collect internationally renowned experts, International educationists, and in conjunction with research scholars. Established a dedicated Research Centre - the International Brain Research Institute (IBRI) with a team to prepare a framework and a system that works to bring about tremendous reforms in the education sector of India. IBRI is focussed on preparing 21st-century leaders, world record holders, world brain champions, sportsmen, and worthy trainees who can successfully achieve their goals using IBRI services.

### IBRI - Research Cell

✓ The pioneer and leader in advanced brain and skills development curriculum across the globe.

## Integrated Research & Teaching

At IBRI we are a group of professionals engaged to develop and promote various "neuroscience" related skill programs. These include international trainers, speakers, scientists, researchers, inventors, authors, and motivators. All are experts in different fields holding a lot of World Records in their fields having international status. All our trainers are internationally recognized public figures. Currently, we have more than 8 International trainers working with our IBRI Brain Research Cell.

Skill Education  
Research Centre

## RESEARCH STARTED IN 2008

In 2008, we launched our School studies research cell in India under the guidance of the Great Talented Memory Man of India at the International Brain Research Institute (IBRI). This is the leading research cell for life skill development.

IBRI Research Cell team members are working continuously on the school curriculum to prepare the entire syllabus using the latest mind and memory techniques for helping students achieve better results.

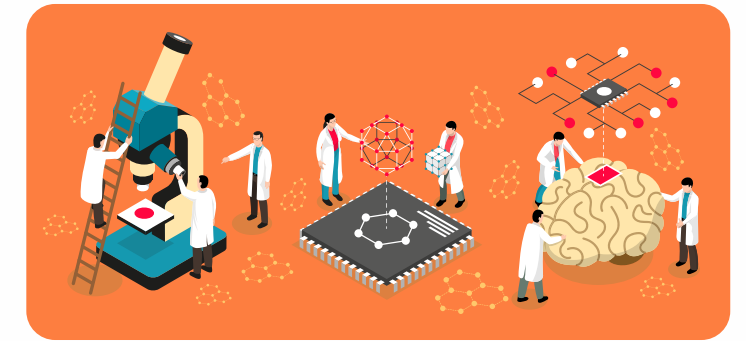

The team keeps in touch with the B2B/Institutional segments and is instrumental to ensure the association is synergise to the focal point for complete success. The team would also be constantly looking for future associations to develop newer modules/products.

It is not enough to have a good mind,  
the main thing is to use it well - Rene Descartes

### OBJECTIVES OF IBRI

- \* To endow students with extraordinary skill power.
- \* To help students achieve better results
- \* To make student's examination stress free
- \* To make students self-confident
- \* To make students attain success in board & competitive exams
- \* To carve a niche for the School in terms of brand equity and best results

IBRI realized the problems being faced by students in the conventional education system, with the vision to shape the way of the coming generation we at IBRI Research Cell took an initiative to enable students to permanently store the information in their minds. While teaching the students, we realized that everyone is using the method of memorization incorrectly, most of the students are cramming rather than memorizing permanently, Due to which they forget the information after some time. Thinking seriously on this matter, we found that the conventional way of education is not of the desired standard, we then started working on new research – how the brain works? why do we forget? what is the scientific way to memorize information permanently? With this task at hand we started research in the field of memory, concentration, focus, Vedic -mathematics and neuroscience and invented several techniques to enhance, sharpen, boost and simplify the education field. IBRI resolved that it will also change the method of education and skill training being imparted, apart from entrepreneurship development programs providing equal opportunities to all.

Asia's first Cognitive Science  
Research & Development Institute  
was inaugurated by Education  
Minister, Govt. of Himachal Pradesh,  
India on 26th November 2018 to  
improve the quality of education.

**Kanya Mangal**

Managing Director, IBRI.

## © IBRI Research at a Glance

[www.ibri.in](http://www.ibri.in)

[@ibriedtech](#)

## A NEW EDUCATION PERSPECTIVE

In conjunction with the department of education, we are responsible for imparting such training and feedback sessions by our researchers who rectify the errors of approach either on the spot or after a promised period because all the technologies are very vast hence some research may involve in certain cases. We will not shy to quote any international educational scientists with thanks and with a vision to spread these tools to reach everyone.

# Academics

Our programs unlock the next levels of advancement in a given program such as math or science or English but it will depend on the time and practice done at IBRI as per expert guidelines. Several other additional skills are compulsory for every student at school in addition to job-oriented or career-oriented education. For each child as per IBRI periodic analysis indicates and decides the way to be paved a way which leads to a child's perfect education in all terms making him what he desires to be. It helps you attain an education that guarantees the achievement of the goals of an individual child.

## IBRI Boosts your Child's Learning

IBRI making teaching better. IBRI is a proven learning program that gives your child important thinking skills and an approach to learning new constituents autonomously. The key to IBRI Programs is individualized instruction with the help of IBRI tools by an expert teacher. Apart from the academic education, and individualized instruction by IBRI we promise that your child will progress through his / her own advancement step-by-step provided in the system.

### How IBRI is unique in terms of other learning Institutes?

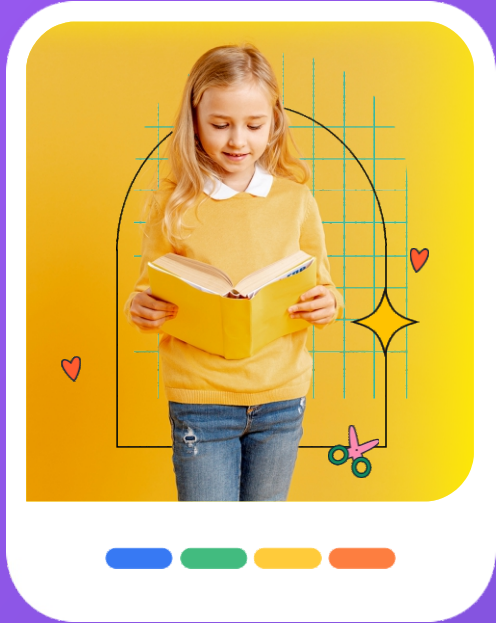

The IBRI Programs are designed to enhance your child's understanding and obligation for learning – giving them an advantage throughout life. Learning is a pillar of student triumph, but other aspects can lift academic skills to innovative stages.

IBRI instils critical thinking skills, our program releases students from numerous distinctive limits of education. The research imparted by IBRI over time to time has led to accelerated learning throughout life. IBRI parents find their children's performance above desired goals.

## IBRI Advantages

### What makes us special?

IBRI is one of the best institutes for skill education research and development. We focus on scholastic development, personal growth, and ethical enrichment. Several schools of different boards and brands seem quite similar in terms of teaching and learning methodologies but none of them is trying to use the methodologies of the latest scientific-pedagogical techniques and equipment which is considered the main advantage of IBRI. It enables our students to be idols for the students studying at other conventional schools and so-called smart learning system schools.

### © Flexible Learning

The flexible learning program helps its students to memorize practically all that a student needs to memorize. Using IBRI methodologies, students can store information in their subconscious mind as a permanent memory. Students can learn their syllabus with flexible learning quickly, remember things for a longer duration (permanent memory), and recollect the information quickly when desired. The current Education System uses a rote learning method which leads to forgetting information completely over time. Because as per scientific research, while cramming we use our single part of the brain, which prevents the information from being stored in our subconscious mind and results in forgetting the information. All children have their own learning style, which means one can be best at Visual Learning Style and another at Auditory or Kinesthetic Learning Style. While cramming we use only the auditory learning style and children with other styles of learning abilities have to face numerous problems while memorizing and recalling the information. Some children can memorize information by just reading (Auditory Learner) 2 or 3 times but some have to write (Kinesthetic Learner) 2 or 3 times on the paper as well, few come under the 3rd category Visual Learner (Note: Visual Learning Style is 20 times stronger than other learning styles) this kind of children can't learn information by reading and writing, they can learn by watching videos of topics or by using imagination using Photo Memory, Mind Mapping, Flexible Learning, and Mnemonics, etc. These methodologies are not yet available in any of the education systems. Flexible Learning System uses all learning styles of humans such as Visual, Kinesthetic and Auditory to learn a topic. In this style dedicated movie is played for every chapter which covers Visual and Auditory Learning Styles. The holistic worksheets are provided for practice and students indulged in the Activity / Role Play / Teaching Others method to use their Kinesthetic Learning Style. All this empowers learners with Permanent memory for that particular chapter.

### © Brain Analysis

Analysis of a child using the scientific method of detecting their interests, sensitivity, best abilities, strengths, weaknesses and other behaviour-related qualities and disabilities. The process is a combination of various analyses and processes including the DITA Test, Aptitude Test, Brain Mapping, and expert counselling. The individual report of a child will have every remark about the above-discussed results which will describe the changes of those results periodically, which may have remedial actions involving parents' efforts.

# OUR FOCUS

IBRI addresses all the concerns of parents regarding their child's overall development in terms of education and moral values apart from equipping the children with every tool to live a perfect life.

Our main focus is to empower everyone with life skills.

IBRI is the only institute that prepares students who will achieve their stipulated goals and become ideal individuals with extraordinary skills, true values and expertise in most fields desired, which will make them different from other students. IBRI works in response to the famous letter written by a father, who was the former president of the United States of America. Abraham Lincoln wrote to the teacher of his child what he wants to teach junior Lincoln and make him a complete gentleman.

## A Letter from Abraham Lincoln to his Son's Teacher

My son starts school today. It is all going to be strange and new to him for a while and I wish you would treat him gently. It is an adventure that might take him across continents. All adventures probably include wars, tragedy and sorrow. To live this life will require faith, love and courage. So dear Teacher, will you please take him by his hand and teach him things he will have to know, teaching him – but gently, if you can. Teach him that for every enemy, there is a friend. He will have to know that all men are not just and that all men are not true. But teach him also that for every scoundrel there is a hero, that for every crooked politician, there is a dedicated leader. Teach him if you can that 10 cents earned are of far more value than a dollar found. In school, teachers, it is far more honourable to fail than to cheat. Teach him to learn how to gracefully lose, and enjoy winning when he does win.

Teach him to be gentle with people, and tough with tough people. Steer him away from envy if you can and teach him the secret of quiet laughter. Teach him if you can – how to laugh when he is sad, teach him there is no shame in tears. Teach him there can be glory in failure and despair in success. Teach him to scoff at cynics. Teach him if you can the wonders of books, but also give him time to ponder the extreme mystery of birds in the sky, bees in the sun and flowers on a green hill. Teach him to have faith in his own ideas, even if everyone tells him they are wrong. Try to give my son the strength not to follow the crowd when everyone else is doing it. Teach him to listen to everyone, but teach him also to filter all that he hears on a screen of truth and take only the good that comes through.

Teach him to sell his talents and brains to the highest bidder but never to put a price tag on his heart and soul. Let him have the courage to be impatient, let him have the patience to be brave. Teach him to have sublime faith in himself, because then he will always have sublime faith in mankind, in God.

This is the order, teacher but see what best you can do. He is such a nice little boy and he is my son.

## Methodology of Pedagogy

Pedagogy means most commonly understood as the approach to teaching, refers to the theory and practice of learning, and how this process influences, and is influenced by, the social, political and psychological development of learners. Pedagogy, taken as an academic discipline, is the study of how knowledge and skills are imparted in an educational context, and it considers the interactions that take place during learning. Both the theory and practice of pedagogy vary greatly, as they reflect different social, political, and cultural contexts. This indicates that the process of learning or teaching is quite clear. It lays the importance of the involvement of science and technology. IBRI is a platform dedicated to child education and vocational training along with other moral values and ethics embedded.

IBRI imparts education as per the definition of pedagogical methods in letter and spirit to a child using advanced technologies and equipment to educate the child comprehensively. Usually, people just see the surface meaning or literal meaning of what has been said or written, which can lead to undesired results in terms of education of children, which may prove problematic at school in the next classes as the real meaning of the said content was something else. IBRI underlines the importance of the foundation of your child's education and well-being. Therefore, it is a significant part of the findings of research and development done by an expert team appointed by the IBRI Research Cell.

According to the definition of learning, a student who goes out of the house to school and in society, to learn and to take the right direction, IBRI enable children to learn to read and write as well as to learn to establish good relations. We cultivate excellent habits among our students to make them responsible human beings who care for the world and always solve any sort of issue. We make them proficient in the art of living a full and happy life that enables them to deal with every adverse situation easily.

Periodic creative evaluations are integrated into all subjects to efficiently identify the strengths and weaknesses of a child. IBRI designed programs are used to interpret the data collected and the results are a part of the ongoing scientific evaluations of the child. The analysis is further used to tackle the issues of the children about their strengths and enable them in making future vocational choices.

## Life Skills

Apart from the academic curriculum designed by IBRI in accordance with the board and affiliate bodies, we at IBRI lay special emphasis on some compulsory activities, for example, Formal Social Interaction Etiquette, Communication / Interpret, Body Language, Personal Safety, Social Responsibility, Soft Skills, Confidence, Handling Emotions, Creative Thinking, Problem Solving, Leadership Skills, Interpersonal Relationships, and Good Decision-Making Skills. All this empowers everyone with Life Skills and enables them to Face the Challenges of Life.

**The Tribune**  
Local lad creates world record in memory  
Bathinda, March 10

A local lad has created an 'unbreakable' world record by memorising a calendar for unlimited years. Sababbi Mangal, who heads Intelligence Educations Brain Mensa here, demonstrated the skill before the authorities of the Indian unit of the Record Holders Republic (RHR), UK, at Vissvesvaraya National Institute of Technology, Nagpur, on March 1.

Providing recognition to his ability, Kapil Kalra, president of the RHR, India, issued him a certificate that said Mangal has been added to its 'Registry of Official World Records' for 'memorising unlimited years'.
