

# CAREER+

"Scientifically designed brain analysis and career counselling solution aimed at helping students discover their true potential. Using a combination of DITA Test, Aptitude Test, Brain Mapping, and expert counselling, Career+ provides deep insights into each student's interests, abilities, strengths, weaknesses, and behavioural traits. This personalised approach helps students make informed decisions about their education and career pathways, ensuring a well-rounded growth experience that aligns with NEP 2020 standards. Empower your students with the clarity they need for a successful future."

## Learning and Career Guidance through Brain Testing

# IMPORTANT !

Read it carefully...

In the next few minutes, you will get very important information about your child/students

This information can change the way you think about your child.

Every child on this earth is born with unique in-born strengths, but parents fail to recognize that strengths.

Rather than working on strengths, we always work on the weaker side of a child.

Around 90% of the total working population is doing work that is not meant for them or either they don't want to do that work.

# Do You Know?

Every year in India more than 12,000 students commit suicide.

According to the W.H.O. (World Health Organisation), around 70% of students are under stress.

A 2-year-old child can be a victim of stress.

## DUE TO UNDUE PRESSURE

Parent Pressure,  
Peer Pressure,  
Teacher Pressure,  
Exam & Study Pressure

# Read it Carefully

- o Have we given Birth to Children or Mark Sheets?
- o While you're debating about your children's future, they might be thinking of ending their Present.
- o In pursuit of their parents' dreams, children usually sacrifice their own.

**Because you know your child very well and fully understand their needs.**

**Right?**

**SO ARE YOU READY?**

**Answer few  
questions  
about  
your child**

**GIVE HONEST ANSWERS TO YOURSELF.....!**

# Do You Know?

There are 3 types of learning styles

What is your child's personal learning style?

**Every child has 8 types of multiple intelligences.**

Which is the most powerful intelligence of your child?

## Do you Know?

There are 4 types of acquiring styles.

What is your child's personal acquiring style?

# Do you know, in which career your child will perform the

# Dermatoglyphics

Dermatoglyphics is a scientific study of fingerprints. These fingerprints are called “Ridges” which are directly connected to the lobes of the human brain. As you know there is no one in the world has the same fingerprints, and once they are formed they will never change the shape of ridges.

During 13 weeks of the gestation period, the brain starts developing which may develop up to 25-27 weeks, simultaneously fingerprint ridges are formed. When a child is born, their brain and ridges are fully formed.

## WHAT IS DITA

Dermatoglyphics Inborn Talent Analysis (DITA) is a scientific term for the analysis of fingerprints. It is a method to discover human brain potentials (8 multiple intelligence), strength-weakness, innate character, learning style, and working style through professional fingerprint analysis.

Our R&D Department's research and study on dermatoglyphics is based on genetics and the connection between dermatoglyphics and the human brain. We read brain information to understand natural talent and then analyze the Multiple Intelligences by dermatoglyphics method. Dermatoglyphics Inborn Talent Analysis can be applied to children and adults.

DITA helps parents understand their children better by exploring their child's hidden talents and understanding their learning patterns.

DITA helps individuals to explore hidden inborn intelligence and their style of learning. This further helps in guiding the individual to progress throughout life with the right career path.

DITA helps corporations in recruitment and efficient communication.

DITA helps Couples improve their relationship and develop understanding by revealing inborn multiple intelligence.

DITA helps business partners in planning and achieving future goals.

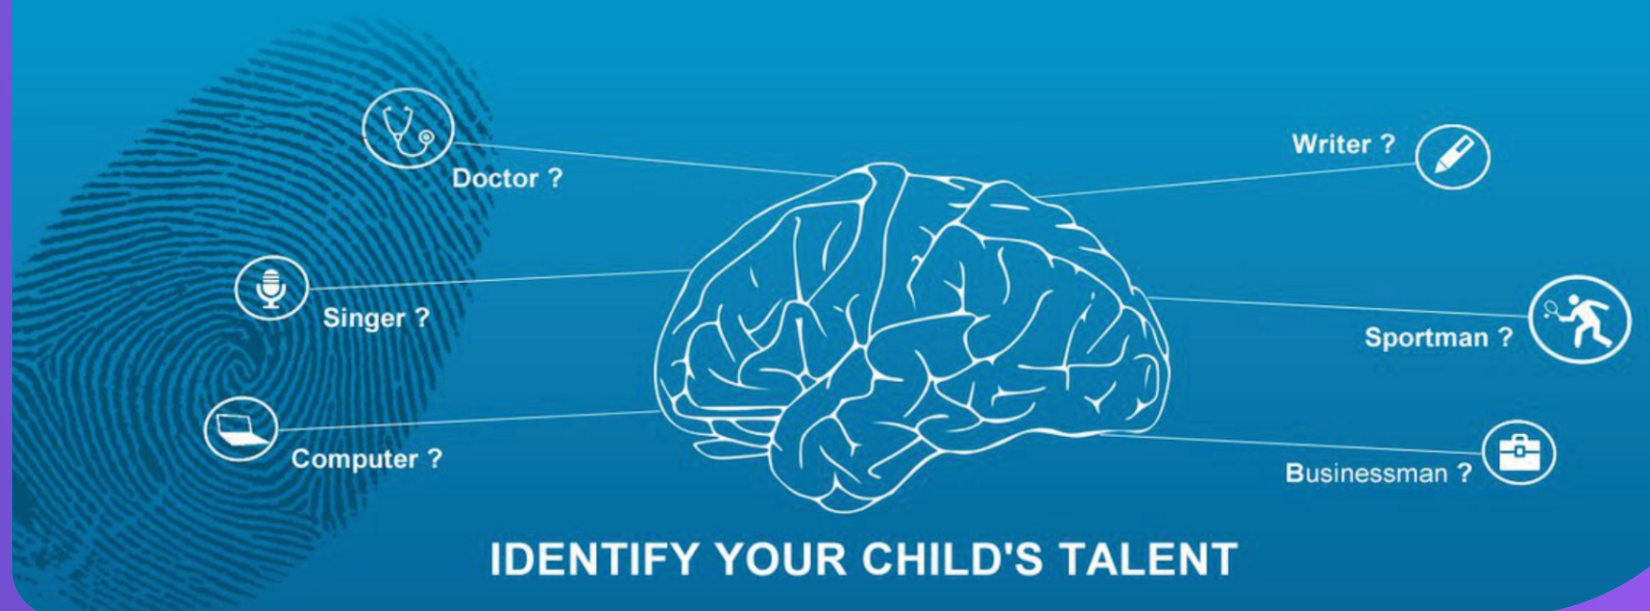

We are committed to creating awareness and educating the masses about the benefits and needs of DITA. We feel that irrespective of race, faith, or belief every individual across the globe deserves to identify their intelligence.

## Team IBRI - We will help you, Know you, develop you better.

We are a group of experts who are focused and sharp skilled individuals, who constantly find ways and means to revolutionize the world through our specialized services. We are delighted to introduce the concepts that enable you to discover and project your true potential paving your way towards a successful, quality-driven, and stress-free life.

We are unique because the work that we do is unique straightforward to understand, and quick to use, with instant results. Through our specialized fingerprint scanning and counselling services, we enable you to accelerate your existing performance. We aim to empower you to use your potential and work towards a better tomorrow.

# Why Brain Test is Important?

It helps us to understand whole-brain configurations, identify our actual strengths and weaknesses, and RIGHT Career Selection after 10th Class which is the most significant one.

- + Personality Traits
- + MI status
- + life goals
- + Best Thinking Type
